

THE EARTH IS THE ANTENNA

Clifford E Carnicom

Mar 18 2003

Research has been underway for several months in the field of Extremely Low Frequency (ELF) radiation in conjunction with, and as a consequence of the covert aerosol operations that have been conducted for more than four years upon an unconsenting public. Various geometric and artificial radiation patterns are being observed and recorded in this biologically critical frequency range (ELF) of the electromagnetic spectrum.

The fundamental principles of the HAARP (High Frequency Active Auroral Research Program) have once again come to the forefront of this research.

The role of aerosols, ionization, electromagnetic radiation and the creation of an artificial 'plasma' state in a now artificially modified atmosphere has already been discussed. These building blocks, along with present observations and the stated premise of the HAARP project bring us to a new threshold of understanding of the immediate and direct effects of the HAARP project upon this planet.

Although it has been stated within the literature of HAARP, it can now be directly understood by this researcher that the magnetic field of the earth is a primary medium by which we, as subjects, are being affected. The artificial patterns of ELF energy, characterized by unusual pulsations of frequency, can now be most logically assumed to originate from the HAARP facility or technology. Such energy forms have a myriad of applications in the military arena. Unfortunately, a parallel set of effects upon biological systems, health and mental functioning must also be accepted as a price to be paid.

The issue involved here is no less than that of the control of the planet.

Control of the planet with the methods that are used to manifest power - control of your environment, and by affecting your life and health. The tools of war and the prestige of military might often serve as the means of implementation, and it is no different in this case.

A prediction of a technical nature can now be made to confirm if such a sweeping and dramatic claim can reasonably be made. In essence, it appears that each of us should be able to construct a HAARP "receiver", as it were, to test out the hypothesis. The significance of this test is that it involves frequencies and fundamental physical characteristics of this earth that affect our lives, health and freedom as a species.

A certain event is now expected to occur. This prediction can be tested by those with an interest in the welfare of this planet. If a sufficiently sensitive ELF receiver and a directional antenna is constructed, it is proposed that the primary energy discovered by that system will travel along the magnetic field lines of the earth. The state of knowledge is such that the casual citizen can now know where to point the antenna to see what is being done to him or her without consent. Pulsations and geometric patterns of ELF radiation upon the human species are not to be dismissed; they are to

be disclosed and agreed upon by an open society.

It is worthwhile and necessary to relay the introduction to Bernard Eastlund's patent of 1987, entitled, "Method and Apparatus for Altering a Region in the Earth's Atmosphere, Ionosphere, and/or Magnetosphere", which can be regarded fairly as the essence of the HAARP project:

"This invention relates to a method and apparatus for altering at least one selected region normally existing above the earth's surface and more particularly relates to a method and apparatus for altering said at least one region by initially transmitting electromagnetic radiation from the earth's surface essentially parallel to and along naturally-occurring, divergent magnetic field lines which extend from the earth's surface through the region or regions to be altered."

It is hoped that the reader will take the necessary time to understand this conceptual foundation of the HAARP project, and the role of the magnetic field of the earth must become a part of that process. When this comprehension is complete, I would suggest that the title of this paper should more accurately read:

"The Earth's Magnetic Field IS the Antenna, and YOU Are A Part of the Receiver"

Large amounts of energy are being directed into the magnetic field of the earth by the HAARP facility. This energy is being directed along the earth's magnetic field lines to you. It surrounds you and you have no simple means (at least not yet) to evade it. This energy is, in part, as stated within the HAARP literature, within the ELF portion of the electromagnetic spectrum. This ELF radiation, although innocuously claimed to serve communication purposes and the like, DOES have an effect upon biological systems; research into the topic of cyclotron resonance upon physiologically important ions will further that knowledge. This energy can be detected and observed and its artificial nature identified. It has been measured at a maximum in accordance with the direction of the magnetic lines of the earth. All findings are consistent with over four years of research on the aerosol operations, with applications of environmental, biological, electromagnetic, military and planetary control.

My primary role in these affairs is to provide information and analysis for your review and consideration. Much work remains to be done, as the problems are infinite and the resources of time alone are finite. My appeal is that you use this information to uphold and preserve your health, your dignity and your free will.
