

Welcome to the Fall Newsletter

Carnicom Institute is a non-profit organization working solely for the benefit of humanity and the public interest. Our goal is to provide the public with beneficial and responsible information concerning human health and the environment. The Institute is extensively active in conducting scientific research and public education relating to the consequences of geoengineering and bioengineering. Thank you for your support of Carnicom Institute. We look forward to providing updates on our current activities and progress.

*note the beauty of Lake Tahoe's Fall Season and the irony of the aerosol trails littering the sky and lake reflection.

Research Report

Morgellons Research – HEALTHY PEOPLE NEEDED!

Carnicom Institute wishes to emphasize that in order for the Morgellons Research Project to be completed, an adequate number of participants must be procured for each group. In particular, we are seeking healthy individuals to participate in Group II as members of the "control group." The need for healthy individuals to contribute to this study is *critical*.

Unfortunately, our effort to recruit healthy individuals into this study has been challenging. If you are fortunate to be healthy and willing to help those in need, please contact us with your interest to participate at info@carnicominstitute.org.

Healthy people... can help others!

Environmental Filament Study

A unique environmental filament material has been documented on numerous occasions for more than a decade. It has been found in both an airborne form and at ground level. Carnicom Institute is conducting a comprehensive scientific investigation of filament samples. We are asking the public to provide these samples and we need your help. Follow this link and get involved. [Filament Study](#)

Interviews

On October 4th, researcher Clifford Carnicom was a featured guest along with holistic nutritionist Nancy Guberti on a blogtalk internet radio show hosted by Pamela Crane. Pamela is the spokesperson for Morgellons Focus on Health which is an all volunteer organization. They act as health advocates for those suffering from toxic based disease such as Morgellons, Autism, Tick Born Disease, Vector based illness, Chronic Fatigue, and stubborn toxic weight gain. Their blogtalk is the combined efforts of a valiant few. Pamela blogtalk site: <http://www.blogtalkradio.com/pamcrane> and Nancy Guberti's site: <http://nancyguberti.com/>.

Mr. Carnicom discussed the history related to Morgellons, the chemistry of his methodology in the research and the current Morgellons Research Study underway at Carnicom Institute. There are two "in progress" research papers available by Clifford Carnicom and be found here: [The Breaking of Bonds and the Reduction of Iron](#) and [Amino Acids Verified](#). Also, available for listening is a research discussion on the former paper by clicking here: [Morgellons Research Discussion](#).

On October 22nd, Alan Baron, Carnicom Institute's Director was invited back as a featured guest with Pamela Crane's Focus on Health blogtalk internet radio show. Mr. Baron was able to expand upon and discuss in more detail the Morgellons Research Study and how to participate.

Listen to the interview by clicking this link:

Carnicom Institute's goal is to participate in one interview each month, if time permits. Public education of our research and finding is of utmost importance. Please visit our media page at www.carnicominstitute.org to listen to past interviews.

CBC - Consciousness Beyond Chemtrails Conference

On August 19th, Clifford Carnicom presented at the Consciousness Beyond Chemtrails Conference in Los Angeles, California. Mr. Carnicom's lecture was titled, "Geo-Engineering and Bio-Engineering: The Unmistakable Link." He was the final presenter at the three day conference which was viewed locally as well as across the United States and in other countries worldwide.

Overall the conference was an amazing event bringing together many advocates and activists working to understand and expose the environmental and health problems caused by the aerosol disbursements in our skies. Unfortunately, Mr. Carnicom was unable to complete his full presentation. Carnicom Institute plans to record the Mr. Carnicom's full complete lecture in the near future and post to our youtube channel. In the meantime, DVDs of the event are available for purchase.

The full event or individual presentations can be purchased by visiting www.consciousnessbeyondchemtrails.com.

A preview of the conference can be viewed: [Clifford Carnicom at CBC](#)

Research Papers

More than a year of concentrated and dedicated effort by Clifford Carnicom allows the presentation of four research papers: (Click the research title in blue for the link)

[Morgellons: A Thesis](#) : this paper describes the significant disruption and role of iron that is associated with the Morgellons condition.

[Proteinaceous Complex Identified](#) : an important proteinaceous complex has been identified within the Morgellons culture study, and this represents an important pathway to future research on the mitigation of the Morgellons condition.

[Morgellons: The Breaking of Bonds and the Reduction of Iron](#) : Three methods that appear to interfere with the molecular bonding of the iron-dipeptide complex that is now understood to be characteristic of the "Morgellons" growth structure have been established and identified. This result has been a primary target of research through this past year, and it may represent an important potential inhibitor to the structure growth.

[Amino Acids Verified](#) : The existence of certain amino acids, namely cysteine and histidine, as a dominant aspect of the "morgellons" growth structure, appears to have been verified. This finding, along with that previously recorded on the important role that iron plays from a compositional standpoint, may be a highly important window into the structural framework of the morgellons condition.

Carnicom Community

Take part in our growing community. Join us on **[Facebook](#)**.

We work hard to keep up on our communications yet often we find we fall a tad behind. Please remember Carnicom Institute is an all volunteer organization. We cannot answer medical question but we are on your team in the pursuit to be healthy and promote a clean environment in which to live!

Media

Carnicom Institute has a YouTube channel:

Video and audio material will be increased on the site as it becomes available. Be sure to check frequently for new uploads.

[Carnicom YouTube Channel](#)

The ground breaking documentary Cloud Cover has been posted on the YouTube site. Be sure to visit the site soon, if you have not done so.

The Carnicom Institute Environmental and Health Conference (October 2011) DVD is in production and will be available as soon as possible.

Donations:

Thank you all for your generous support!

The institute still needs your help. To advance our research, we will be seeking donations for facility lease, infrared spectrophotometer and an advanced digital microscope.

When you donate, a thank you gift will be sent.*

Donating is easy just follow the "chip-in" link on our website.

(click above to visit the donation page)

*All donations are appreciated
to help in our pursuit of healthy living!*

* Thank you gift applies to donations \$15 and up.

Join Our Team!

We need volunteers with a broad array of skills. Many of our volunteer jobs are easy. We need immediate help mailing DVDs, spreadsheet documentation, and keeping up on communication. Express your interest now by clicking this link: [**Volunteer Now!**](#)
Become active with the issues involving all of us.

The following teams are now operational:

- **Administrative & Office:** Manage correspondence; create & maintain informational spreadsheets; create Institute Handbook; recruit prospective volunteers and guest speakers; develop mailing lists; telephone responder & account management.
- **Communications:** Journalists/Writers/Speakers/Interviewers/Moderators; Newsletter development, press releases & brochures. Conduct interviews of researchers; speeches/presentations/interviews; work with other socially conscious groups/individuals, grant writing, translators.
- **Researchers/Consultants:** Propose/develop research as approved for eventual publication & distribution, prepare research papers, develop innovative technology and systems.
- **Website & Internet Mgt:** Help develop, update and maintain website, search engine promotion, website database-library development, social networking.
- **Technical Media Production:** Audio & Visual Recording/Editing/Production, Webinar recording, editing production, record live events or audio interviews.

- **Marketing and Funding:** Marketing & fundraising, propose & implement fund raising ideas.
- **Legal/Paralegal:** Assist in evaluation of laws, rules and regulations; evaluate complex documents as patents, federal & state tax and non-profit compliance.
- **Other Positions:** Grant Writer, Translators, Marketing Consultant, Fundraising Consultant, and Secretary/Treasurer.

Grant Writer Needed

Carnicom Institute is seeking the assistance of an experienced grant writing firm or individual. Grant opportunities for non-profits are being sought in the field of environmental research and public health. Identifying and securing such funding opportunities will enable Carnicom Institute to continue to perform its vital work and public outreach. Such funding would be applied to expenses such as independent lab testing, in-house testing equipment, professional consulting, and other associated costs. We hope you'll join our dedicated team.

History of Carnicom Institute

On November 13, 2008, Carnicom Institute became a domestic nonprofit corporation chartered in the state of New Mexico. On March 8, 2009, Carnicom Institute received approval from the New Mexico Attorney General's office to operate as a nonprofit organization. In August, 2011, Carnicom Institute received formal notice that its request for 501 c3 status pursuant to IRS Code had been approved. What this means is that all donations to Carnicom Institute are tax deductible as charitable contributions.

Institute Disclaimer

Carnicom Institute is a non-profit health and environmental educational and research organization serving the public welfare. We do not advocate any proprietary products, protocols, or therapies. Our purpose is to provide information and education to the public. It is up to the audience to make an educated decision on how to use the information that is presented. The Institute is not a clinic and does not perform any medical diagnosis, medical treatment, or prescription of therapy. All studies conducted by the Institute are for research purposes only. Any presentation, opinion or expression by any representative of the Carnicom Institute or outside affiliation in no way implies or denotes endorsement by the Institute. The Institute is not affiliated with any political or religious groups. If you would like to support the work of the Institute through a financial donation or by volunteering your talents, please send email to info@carnicominstitute.org or leave a message at 505-629-1484.

Thank you for your support!
